The Financial Stress Model predicts the likelihood of a firm ceasing business without paying all creditors in full, or reorganizing or obtaining relief from creditors under state/federal law over the next 12 months. Scores were calculated using a statistically valid model derived from D&B's extensive data files.

Financial Stress Class:	1
(Highest Risk: 5; Lowest Risk: 1)

The Financial Stress Class for this company is based on the following factors:

- No open record of suit(s) in the D&B files.
- No record of open lien(s), or judgements(s) in the D&B files.

- 13% of trade experiences indicate slow payment(s) are present.

Notes:

- The Financial Stress Class indicates that this firm shares some of the same business and financial characteristics of other companies with this classification. It does not mean the firm will necessarily experience financial stress.
- The Incidence of Financial Stress shows the percentage of firms in a given Class that discontinued operations over the past year with loss to creditors. The Incidence of Financial Stress - National Average

represents the national failure rate and is provided for comparative purposes.

- The Financial Stress National Percentile reflects the relative ranking of a company among all scorable companies in D&B's file.
- The Financial Stress Score offers a more precise measure of the level of risk than the Class and Percentile. It is especially helpful to customers using a scorecard approach to determining overall business performance.
- All Financial Stress Class, Percentile, Score and Incidence statistics are based on 1997.
